Professional Summary

Software Engineer with 2.5+ years of experience building scalable web applications using React, Next.js, and TypeScript, with contributions to backend services using NestJS and Go. Led frontend team, implemented modular architectures (Monorepo & Micro frontend), introduced robust testing and CI/CD pipelines, and collaborated globally to deliver secure, performant, and user-focused solutions.

Work History

SDE II - (iRM Cloud)   March 2023 - Present | Kolkata

- **Led frontend team** to deliver multiple high-impact modules, collaborating across time zones (India, Germany, UAE).
- **Contributed to backend development** of microservices using NestJS and Go, working within a microfrontend-aligned ecosystem supporting high-volume enterprise use cases.
- **Architected and deployed** Monorepo structure with Nx, improving code reuse and reducing onboarding time by 40%.
- **Designed Micro Frontend architecture**, enabling independent deployment of 3+ modules, enhancing scalability.
- **Integrated Storybook, Jest, and Playwright**, achieving 80%+ test coverage and catching critical bugs pre-release.
- **Implemented CI/CD pipelines via GitHub Actions**, reducing deployment errors by 60% and accelerating release cycles.
- **Refined UI/UX processes using Figma**, shortening feedback loops and ensuring WCAG-compliant, user-centered designs.
- **Developed reusable React component library**, increasing development speed by 70% and enforcing design consistency.
- **Conducted client workshops in the Middle East** to gather requirements using structured interviews and collaborative sessions, ensuring alignment with business goals and enhancing client satisfaction.
- **Led VAPT integration**, aligning apps with security best practices and client compliance mandates.
- **Contributed to legacy and modern projects using Angular and Node.js**, ensuring smooth migration paths and consistent performance across stacks.

Skills

Languages: HTML, CSS, JavaScript, TypeScript, Rust, SQL
Frameworks/Libs: React, Next, Angular, Redux, Node, Nest
Databases: MySQL, SQLite, PostgreSQL, MongoDB
CI/CD - DevOps: GitHub Actions(CI/CD), Docker
Others/Misc: VAPT

Architectures: Monorepo, Micro frontend
Testing: Jest, Playwright, React Testing Library, K6
Tools: Git, Grafana, Figma, Storybook, NX, Postman
Cross Platform: React Native, Tauri

Education

Chandigarh University   June 2017 - July 2020 | CGPA: 7.0
Bachelor of Computer Applications (BCA)   Chandigarh, Punjab

Awards, and Accomplishments

Campus Ambassador, EDC IIT Delhi.   Intern at Bobble App

Certifications and Workshops

Web Application Development - Foxmula   Web Development Training - Internshala
JavaScript Bible - JavaScript Bootcamp   Foundation of Front-End Web Development
Participant - World IOT Hackathon   Participant - Google Hash Code
Attendee - Microsoft C# Corner Developer Event
